

ART && CODE

Programming is something we
can all do, should all do, and
probably have reason to do.

(we as artists)

Software's role in art is
not well defined.

Software's role in culture
is not well defined.

"Computation influences culture.
Culture influences computation."

For most people, software is
something someone else makes.

"Programming (an everyday skill), and Computer Science (a research subject) are different."
